Education

Chaitanya Bharati institute of technology

B.E in Artificial Intelligence and Data Science

Nov. 2022 – June 2025

CGPA 8.47

Government Polytechnic College Nizamabad

Computer Engineering

2019 – 2022

CGPA 9.44

Experience

Turing | *Business Analyst*

Sept 2025 - Present

- Building AI systems for database analysis across backend, agent, and product layers.
- Designed structured LLM auditing workflows to detect missing indexes, circular dependencies, and schema risks.
- Built Python REST APIs with FastAPI and SQLAlchemy to convert model findings into traceable diagnostics and executable SQL remediation.

Projects

OpsPilot | *FastAPI, Next.js, Gemini, Local LLMs, SQLAlchemy*

Live Demo

- Built an agentic customer-operations system that converts unstructured feedback into engineering tickets, customer replies, founder summaries, and incident insights.
- Implemented intent routing, planner, critic review, quality scoring, risk policy, provider fallback, and execution tracing.
- Added human approval gates and evaluation benchmarks to make high-risk AI decisions auditable and reviewable.

SchemaLens | *Python, FastAPI, SQLAlchemy, React, D3.js, Local LLMs*

- Built a database intelligence system that introspects relational schemas and surfaces structural debt, missing indexes, relationship risks, and remediation steps.
- Supported PostgreSQL, MySQL, and SQLite schema extraction across tables, constraints, indexes, and relationships.
- Created interactive D3.js schema exploration with Text-to-SQL, SQL explanation, and actionable SQL fix generation.

Vehicle Insurance Prediction MLOps | *MLOps, GitHub Actions, FastAPI, MongoDB, AWS*

Code

- Designed ingestion, validation, transformation, and training pipelines using Python and modular ETL architecture.
- Built automated data workflows using GitHub Actions and Docker, ensuring reproducible pipeline execution.
- Exposed prediction pipeline via FastAPI and integrated MongoDB Atlas with cloud storage for scalable data management.

Technical Skills

Languages: Python (Pandas, multiprocessing, clean code practices), Go, R, C/C++, PHP, FastAPI, Java, Javascript.

Cloud: AWS, GCP (S3, EC2), Docker, Kubernetes.

Data Science skills: ETL Development, Data Modeling, Pipeline Orchestration (Apache Airflow, GitHub Actions), SQL (joins, CTEs, window functions, data transformations), Statistical Modeling, Machine Learning, API Data Ingestion.

MLOps : TensorFlow, PyTorch, Airflow, mlflow, NLP (spaCy, NLTK), CI/CD, Github Actions, Pipeline architecture.

Extracurricular Activities

Electoral Literacy Club (ELC) | *Publicity Co-Head*

- Led outreach for 5+ college events through digital and offline publicity campaigns. Collaborated with a 10-member team to design media assets, increasing participation by 40%.

Learn in Public | *DSA, Project Updates*

Learned DSA in public and posted regular project updates on [Twitter](#) to build accountability and connect with devs.

Coding Profiles

● [Leetcode](#) ● [GeeksforGeeks](#) ● [Coding Ninjas](#) ● [Github](#)

Achievements

- Sharpened my coding skills on GeeksforGeeks, consistently ranking among the **Top 10** Coders in my college.
- Published a review paper in **IEEE Publications** [View Paper](#) and a **Web Extension** on MS Edge Browser.

Summary

• Data Science skilled in building end-to-end data pipelines, performing data ingestion, cleaning, transformation, and creating reliable ETL workflows using Python and SQL. Experienced with Airflow, cloud platforms (AWS/GCP), CI/CD automation, and modular pipeline architecture. strong emphasis on documentation, scalable pipeline design, and data quality. enthusiastic about developing data systems that enhance patient outcomes and healthcare data.
